SUMMARY

A passionate Computer Science undergraduate with a strong foundation in programming, data structures, and problem-solving skills. Proficient in Java, Python, C, and SQL, with hands-on experience in developing academic projects and understanding database concepts. Seeking internship and entry-level opportunities to apply my technical knowledge and contribute to real-world software development and technology-driven solutions.

SKILLS

Programming: Java, Python, C , C++ ,
Database: SQL (DBMS)
Core Concepts: Data Structures and Algorithms, Operating Systems

EDUCATION

2024 - present	B.Tech in CSE at Siddhartha Academy of Higher Education	(GPA: 9.22)
2024	Class 12th Sri Bhavishya Jr College	(966/1000)
2022	Class 10th Nri's Indian Springs	(549/600)

PROJECTS

To-Do List Application (Language Used: Java)

Developed a Java-based To-Do List application to manage daily tasks. Implemented features to add, update, delete, and track task completion using core Java concepts.

Contact Management System (Language Used: Python)

Built a Python-based system to store and manage contact details. Implemented functionalities to add, view, update, delete, and search contacts efficiently.

Online doctor consultation booking system (Language Used: HTML,CSS,JavaScript)

Designed an online doctor consultation booking system to schedule appointments with doctors and manage bookings efficiently.
